

Business Requirement Document (BRD)

Project Name:

Dream_Lanka

Prepared By:

[Vision Coders]

Date: [30/09/2025]

Version:

1.0

Project Overview

Dream_Lanka is a digital marketplace platform (Web + ~~Mobile Responsive App~~).

Its purpose is to help Farmers, Fishermen, and Local Shop Owners in Sri Lanka sell their products directly to Customers.

This reduces intermediaries, ensures fair pricing, provides quality food, and creates a better supply chain.

Objectives

- Provides direct market access for Farmers/Fishermen.
- Ensures fresh and affordable food for Customers.
- Simplifies last-mile delivery through Delivery Partners.
- Builds secure payments and trust through the Platform.

Stakeholders

- Vendors: Farmers, Fishermen, Shop Owners
- Customers: Households, Restaurants, Hotels, Institutions
- Delivery Partners: Independent riders / Logistics providers- Admin/Platform Owner: Business managers, support staff

Scope - In Scope

- Vendor onboarding (profile, KYC, product listing)
- Product catalog browsing & search
- Order placement (Cart, Checkout, Payment)
- Delivery partner assignment & tracking
- Notifications (App, WhatsApp, SMS)
- Vendor payouts (weekly/monthly)
- Multi-language support (Sinhala, Tamil, English)

Scope - Out of Scope (Phase 1)

- International shipping/export orders
- Complex warehouse management
- AI demand prediction (future enhancement)

Functional Requirements - Vendor Features

- Register/Login with mobile OTP
- Add/edit products with image, price, stock
- Receive order notifications
- Manage inventory
- Track earnings & payouts

Functional Requirements - Customer Features

- Register/Login
- Browse/Search products by category/location
- Add to cart & checkout
- Multiple payment options (Cash on Delivery, Card, Wallet)
- Track delivery status
- Rate & review products/vendors

Functional Requirements - Delivery Partner Features

- Register/Login + upload documents
- Accept/Reject delivery tasks
- Navigation to vendor & customer location
- Delivery status updates
- Earnings history & payout

Functional Requirements - Admin Features

- Approve vendors & delivery partners
- Manage product listings (moderation)
- Monitor orders & deliveries
- Handle disputes/refunds
- Generate sales & performance reports

Non-Functional Requirements

- Scalability: Handle up to 100,000 users in Phase 1
- Security: Encrypted passwords, SSL, secure payments
- Performance: Page load < 3 seconds
- Availability: 99.5% uptime
- Multi-language UI: Sinhala, Tamil, English

Assumptions

- Internet & smartphone penetration in Sri Lanka is sufficient for adoption.
- Farmers/Vendors will need basic training to use the app.

- Initial adoption will be region-specific (pilot project).

Risks

- Low digital literacy among rural farmers
- Logistics delays due to poor road infrastructure
- Customer trust issues in first phase (quality, freshness) - Payment gateway availability in Sri Lanka

Success Metrics (KPIs)

- Number of active vendors onboarded
- Number of active customers & repeat orders
- Average delivery time
- Vendor income growth % compared to traditional market- Customer satisfaction ratings
