Profile

Software Engineer Intern with a Bachelor's in Computing from Curtin University, specializing in **Full-Stack Development**. Contributed to **PineappleAi** by launching a responsive frontend with **React (MERN stack)** and currently developing backend services while mentoring two interns. Skilled in **C#/.NET (WinForms)**, **React**, **Tailwind CSS**, and **Three.js**, with a solid foundation in **OOP**, **DSA**, and **MVC architecture**. Completed a **UX Design Diploma**, integrating technical expertise with user-centered design.

Professional Experience

Full-stack Engineer intern, PineappleAi 	08/2025 – Present Sri Lanka
Engineered and launched PineappleAi’s responsive frontend using React (MERN stack); currently developing backend services and mentoring two interns to ensure code quality and delivery.	

Education

Bachelor in Computing Computer Software Engineering , Curtin University	03/2021 – 06/2025
Foundation Information Technology , SLIIT ACADEMY	01/2020 – 01/2021

Core Skills

Programming Languages JavaScript, C#, Java, Python, SQL	Frontend React.js, Tailwind CSS, HTML5, CSS3, Figma, UI Design, Responsive Web Design
Backend & Full-Stack Node.js, Express.js, MongoDB, .NET (WinForms, WPF), SQLite, MySQL	Dev Tools & APIs Git, BitBucket, Postman, OpenAI API, RESTful APIs, AWS (Basics), Gradle, Hugging Face API
Software Engineering MVC Architecture. Async/Await, Software Architecture, Requirements Engineering	UX & Design UX Research, Usability Testing, Prototyping, User-Centered Design

Languages

English (Fluent)	Tamil (Native)	Sinhala (Basic)
----------------------------	--------------------------	---------------------------

Projects

MCQ Application (AI supported)

07/2025 – Present

- Technologies: React, Node.js, MongoDB, Express, OpenAI API, React Router DOM
- Description: Developed a dynamic exam management application with features for creating, managing, and taking exams. Integrated OpenAI for AI-generated questions. The backend leverages Node.js and Express with MongoDB for data persistence, and async operations ensure smooth performance. Includes exam creation and result tracking

Student Management Desktop Application

06/2025 – Present

- Technologies: C# WinForms, SQLite, MVC Architecture, Async/Await, Visual Studio
- Description: Built a school management app with role-based access to manage courses, students, exams, attendance, and timetables. Implemented MVC architecture using async operations.

Photo Gallery App

04/2025 – Present

- Technologies: React, Redux, Unsplash API, TailwindCSS
- Description: Developed a responsive photo management app with grid view, uploads, light/dark modes, and zoomable modals. Designed with usability, accessibility, and modern UI adaptability.

2D Maze Puzzle Game Engine with DSL, Plugins, and Internationalization

07/2024 – 12/2024

- Technologies: Gradle, Java, Locale, Reflection, Jython
- Description: A customizable game engine for 2D grid navigation with DSL configuration, dynamic plugin loading via reflection, Jython scripts, and internationalization for a flexible, global experience

Chat Application using .NET

07/2024 – 12/2024

- Technologies: .NET, WPF, C#
- Description: Developed a server to enable real-time communication for multiple clients using a Windows Presentation Foundation (WPF) client application

Multithreaded Air Traffic Simulation System

07/2024 – 12/2024

- Technologies: Java, Blocking Queues, Thread Pools, Gradle, PMD
- Description: Simulated air traffic across airports built with Gradle using multithreading and real-time requests. Managed concurrency with blocking queues and thread pools; PMD for code quality.

Self-Study Quiz Web Application (Capstone Project)

02/2024 – 12/2024

- Technologies: MERN Stack, Postman, Toggle Track, ChartJS, OpenAI API
- Description: Developed a full-stack quiz platform for self-assessment and learning reinforcement. Promotes self-learning and inclusive education through interactive, user-driven quizzes.

Certificates

Diploma in UX Design
