

Web Training Document

Table of Contents

1. MERN Stack Basics – Presentation
2. Environment Setup
3. Backend – Node.js, Express.js, MongoDB CRUD
4. React JS – Basic Theory
5. React JS – Basic Presentation
6. React JS Environment Setup
7. Simple React CRUD (Add, Get, Update, Delete)
8. REST API CRUD using Dummy JSON API
9. Assignment

1. MERN Stack Basics – Presentation

References:

- Tamil – <https://www.youtube.com/watch?v=57userCwqdA>
- English – <https://youtu.be/98BzS5Oz5E4?si=S9hAXyDIJ0vXWrFD>

Task

- Watch the videos and understand what MERN Stack means.
- Write notes by hand (all 4 parts – MongoDB, Express, React, Node).
- Make one simple slide to show the MERN flow.

Trainer Response

- ☒ Notes written handwriting
- ☒ Slide done
- ☒ Trainer Reviewed

2. Environment Setup

References: <https://www.youtube.com/watch?v=r5llyiNHJdw>

Task

- Install Node.js, MongoDB, and VS Code.
- Write each step in your notebook (like setup flow).

Trainer Review

- ☒ Notes checked
- ☒ Setup done properly

3. Backend – Node.js, Express.js, MongoDB CRUD

References:

- Tamil – [YouTube Playlist](#) (Skip 8th video)
- English – https://www.youtube.com/watch?v=_7UQPve99r4&t=2296s

Task

- Learn Create, Read, Update, Delete functions.
- Write notes for each part.
- Add small comments in your code to explain what each part does.

Trainer Review

- ☒ CRUD working fine
- ☒ Code neat and clear
- ☒ Notes checked
- ☒ Trainer reviewed

4. React JS – Basic Theory

References: https://youtu.be/cyU_4U1yHI4?si=jALhkDdBQUOfVogp

Task

- Watch and take notes about React basics (Components, Props, State, Hooks).
- Review your notes.
- Ask questions if not clear.

Trainer Review

- ☒ Notes completed
- ☒ Questions asked

5. React JS – Basic Presentation

Topics to Cover:

1. What is React
2. Features
3. React DOM
4. Single Page Application
5. React Hooks
6. How React Works
7. Why use React
8. REST API in React
9. Advantages
10. How React connects with server

Task

- Make a PowerPoint for these topics.
- Optional: record a short video explaining your slides.
- Take notes before preparing slides.

Trainer Review

- ☒ Notes checked
- ☒ PPT ready
- ☒ Presentation done

6. React JS Environment Setup

References: <https://youtu.be/YFj9T7KX-7I?si=la62crJsP6HyJB8D>

Task

- Install React and check if it runs.
- Write steps in your notebook (like a setup guide).

Trainer Review

- ☒ Setup done
- ☒ Notes ready

7. Simple React CRUD (Add, Get, Update, Delete)

References: <https://www.youtube.com/watch?v=pmU2QqCG32k&t=4508s>

Task

- Learn how to Add, Get, Update, and Delete data.
- Write notes for each function.
- Add comments in code to explain what it does.
- Show working output to trainer.

Trainer Review

- ☒ CRUD working fine
- ☒ Notes checked
- ☒ Comments added
- ☒ Trainer review done

8. REST API CRUD using Dummy JSON API

References: <https://www.youtube.com/watch?v=i-3smuUlnHw&t=434s>

Task

- Do CRUD using Dummy JSON API.
- Write notes for each request (GET, POST, PUT, DELETE).
- Comment your code.
- Understand how the request and response work.

Trainer Review

- ☒ CRUD completed
- ☒ Notes checked
- ☒ Code reviewed

9. Assignment With Image Upload

Assignment Scenario: [Click here to view assignment scenario](#)

Task

- Implement **image upload function** according to the assignment scenario.
- Follow the scenario instructions in the document.
- Write notes for each step (upload logic, form handling, how it works)
- Add **short comments** in the code explaining each part.
- Test your function to make sure it works as expected.

Trainer Review

- ☒ Function works according to assignment scenario
- ☒ Notes checked
- ☒ Code reviewed with comments
