

Assignment 1: IT Project Management – ITE2612

Title: *Developing a Work Breakdown Structure (WBS) for an IT Project*

Scenario

Your university has decided to implement a **Learning Management System (LMS) Upgrade Project**. The project aims to enhance the existing LMS by introducing:

- A modern user interface (UI).
- Mobile accessibility (Android & iOS apps).
- Online assessment and grading tools.
- A reporting dashboard for lecturers and administrators.

The university expects this system to be designed, developed, tested, and deployed within a **reasonable project timeframe** (you may assume between 4–6 months).

Assignment Tasks

1. Define the Project Objective (5 marks)

- Briefly explain the purpose and expected benefits of the LMS Upgrade Project in your own words.

2. Develop the WBS Hierarchy (40 marks)

- Using a **life cycle–based approach** (Initiation, Design, Development, Testing, Deployment), prepare a **three-level WBS** for the LMS Upgrade Project.
- Include **at least one milestone** in each phase (e.g., “Requirements Approved,” “Testing Completed”).
- Ensure activities are **manageable (1–10 days of effort)**.

3. Explain Your Decomposition Choices (20 marks)

- In about 200–300 words, justify why you broke down deliverables the way you did.
- Refer to key principles from your reading material (hierarchy, distinct deliverables, 5–9 rule, bottom-up validation, etc.).

4. Provide a Visual Representation (20 marks)

- Create a **WBS diagram** (hierarchical chart OR numbered outline).
- You may hand-draw and submit a clear photo/scan OR use software (e.g., MS Word/PowerPoint, Lucidchart, or similar).

5. Reflection (15 marks)

- In 100–150 words, describe one challenge you faced when preparing your WBS and how you resolved it.

Note:

- Submit as a single PDF with:
 - I. Typed responses for Tasks 1, 3, and 5.
 - II. Visual WBS for Tasks 2 and 4.
- The report should follow a chapter numbering system corresponding to the question numbers above.
- All references should be properly cited according to academic standards.
- Independent research is required for assignment completion.
- Plagiarism or copying from others will result in negative marking.
